

DTS COCKPIT

UNIQUE ON THE MARKET! HEARD IT OFTEN? WE LET THE FACTS SPEAK FOR THEMSELVES:

SEE

by merging of information sources

UNDERSTAND

the data & their correlations

ACT

active attack stopping via DTS data managers

VALIDATE

the solutions & processes, identify entry points

OPTIMIZE

the IT security & DTS SOC Services

» AS ONE OF THE FASTEST GROWING ENABLERS FOR EU-WIDE IT SECURITY & SOC, ONLY WE OFFER:

- 24/7/365 security operations, incl. experienced & well-coordinated SOC → no chance for the growing threat situation & complexity!
- All security areas are covered: maximum visibility, control & response in the network, at the endpoint & in the cloud
- MDR & intervention through bundled, leading security solutions
- Specialized SOC for end-to-end threat hunting & time-critical actions
- Dedicated purple teaming to continuously increase your security level
- "see, understand, act, validate, optimize" in one managed service, with uniform all-in-one pricing

» LACK OF RESOURCES & KNOW-HOW? 24/7 SECURITY OPERATIONS WITH AN INTEGRATED APPROACH!

- Market competitors around the world rarely cover all areas of security & if they do, then by booking their own agents separately → With us: vendor-independent integration & active use of existing security solutions
- AI is often used, but AI does not replace human intelligence → our highly qualified, multilingual SOC is at your side with specialists & you do not need your own SOC
- Many market competitors cannot "act" or interpret it via AI solutions or sets of rules, usually at limited levels → With us: real ability to act through deployed DTS data managers
- DTS Cockpit is not just "a product", but a security platform, based on a clear security concept, as a 100% transparent managed service with significant cost and time savings

» PURPLE TEAMING & INCIDENT RESPONSE

- Only with us: our own purple teaming as your "personal trainer", which is included in the service. Your security architecture is continuously reviewed and all test cycles build on each other. In this way, blind spots are successively eliminated through specific recommendations for action and optimization. We do not sell simple, one-off additional services, tests, scans or similar. We go the extra mile and close security gaps sustainably through targeted roadmaps. Our purple teaming is the key instrument for a resilient security strategy.
- What is the point of security operations without a reliable response force for worst-case scenarios? Many market competitors offer nothing for emergencies. DTS experts ensure business continuity in a time-critical manner so that you remain capable of acting, can react adequately and, above all, can act - without having to purchase high hourly contingents and with unbeatable 24/7 service times.

» PRICING

- There are almost only complex licensing and payment concepts on the market → Almost unique: all important & necessary components are included in the DTS Cockpit from the beginning & you know directly what you get and at what cost

» COMPLIANCE

- Fulfillment of essential NIS2 requirements, EU GDPR-compliant, provided from the German, certified DTS Cloud
- Cross-solution database, coverage of central cyber insurance requirements, regular quality control through purple teaming, among other things

CLEAR FOCUS & REAL QUALITY THROUGH...

- ... an EU provider with operations in Germany
- ... security operations covering all areas of security
- ... top experts in SOC, incident response & purple teaming
- ... real visibility, ability to act & expertise that understands what it sees
- ... a security level that is constantly raised to a new level & at the same time relieves your team
- ... a complete 24/7 all-in-one managed service, with no hidden small print

We see security operations as a service that is easy to consume. The result: simple processes, reaction via our SOC specialists and a high degree of flexibility. In addition, you benefit from a transparent cost package with no hidden clauses. Quality in accordance with the "Made in Germany" seal, developed by German IT engineers, continuously perfected, precise, efficient and reliable - that's what we at DTS stand for!
