

DTS MANAGED VM

IT departments are faced with the challenge of ensuring a future-proof IT infrastructure with limited resources. Particularly burdensome are the constant price increases, which are becoming unbearable for many companies. The DTS Managed VM Service offers a solution here, with DTS taking over the complete management of the HCI environment. This allows you to benefit from a scalable solution without high investments in infrastructure, licenses and specialists. This enables better cost efficiency and more resources for innovation.

Our service combines computing, storage and networking in an integrated architecture. This Hyperconverged Infrastructure (HCI) ensures maximum scalability, simple management, reliability and high availability, optimized performance and efficient use of resources. Resources are adapted dynamically and in line with demand.

By consolidating the IT infrastructure and allocating resources as required, our Managed VM Services enable significant cost optimization by reducing operating costs and increasing the overall efficiency of the IT environment.

With DTS Managed VM, we take your virtualization to the next level - flexible, efficient and future-proof!

THREE MODELS OF DEPLOYMENT FOR MORE FLEXIBILITY

- **Shared environment** - cost-efficient & flexible in our certified, GDPR-compliant data centers in Germany
- **Dedicated environment** - exclusively for your company in our secure DTS data centers
- **Managed HCI on site** - directly in your IT environment, without you having to have to worry about operation & maintenance

YOUR BENEFITS AT A GLANCE:

- **Transparent costs through "pay per use"** - reduce your operating costs & only pay for the resources you really need
- **All-round carefree package** - we take care of monitoring, maintenance & administration, all 24/7, reliably and transparently
- **Maximum availability & performance** - thanks to Hyperconverged Infrastructure (HCI), you benefit from a stable, fail-safe environment with optimum performance
- **DTS-typical premium support** - our team of technical experts is always on hand to assist you personally
